† Towing capacity is subject to towbar/towball capacity. The capacity may be reduced if a non genuine Nissan towbar is fitted. The permitted download is directly related to the laden mass of vehicle. The maximum towball download is 300kg.

### Petrol model

Towball download	Vehicle Mass
170kg	GVM <sup>∞</sup> (All variants)
200kg	Reduced loaded vehicle mass below GVM <sup>∞</sup> by 40kg
250kg	Reduced loaded vehicle mass below GVM <sup>∞</sup> by 100kg
300kg	Reduced loaded vehicle mass below GVM <sup>∞</sup> by 170kg

### Diesel model

Towball download	Vehicle Mass
50kg	GVM <sup>∞</sup> (All variants)
100kg	Reduced loaded vehicle mass below GVM <sup>∞</sup> by 70kg
150kg	Reduced loaded vehicle mass below GVM <sup>∞</sup> by 130kg
200kg	Reduced loaded vehicle mass below GVM <sup>∞</sup> by 200kg
250kg	Reduced loaded vehicle mass below GVM <sup>∞</sup> by 270kg
300kg	Reduced loaded vehicle mass below GVM <sup>∞</sup> by 350kg

<sup>∞</sup>GVM = Gross Vehicle Mass

If the loaded vehicle mass is reduced as shown in the table, the towball download can be increased correspondingly. Accordingly, if the laden mass is 170kg less than the GVM<sup>∞</sup> a towball download of 300kg is approved (Petrol engine). Different trailer types and different trailer manufacturers have varying towball downloads. The customer will need to contact the trailer manufacturer for information as to the download. Nissan does not recommend the fitting of load levelling or weight distribution devices when used with a Nissan Genuine towbar. When fitted and used correctly, the Nissan Genuine towbar is capable of meeting the towbar/towball capacity stated in the above table.

<sup>∞</sup>GVM includes the driver, 6 passengers, fuel and luggage.
